Map update information

Touch & Go (CY11)

Release date: Autumn 2018

Version: 2018

Database: 2018.Q1

Media: USB stick or download by user

System vendor: Harman

Coverage: Albania, Andorra, Austria, Belarus, Belgium, Bosnia Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, Gibraltar, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Kazakhstan, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia (F.Y.R.O.M), Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, United Kingdom, Vatican.

Touch 2 with Go (CY13/16)

Release date: Autumn, 2018

Version: 2018

Database: 2018.Q1

Media: USB stick or download by user

System vendor: Harman

Coverage (Europe): Albania, Andorra, Austria, Belarus, Belgium, Bosnia Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, Gibraltar, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Kazakhstan, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia (F.Y.R.O.M), Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, United Kingdom, Vatican.

Keeping up to date with these and many more features:

Full map navigation

Driver-friendly full map pan-European navigation with clear visual displays for signposts, junctions and lane guidance.

Speed limit and safety camera alerts

Drive safely with the help of a speed limit display and warning, including an optional speed warning setting. Alerts notify you of fixed safety camera locations (in countries where it is legal).

Intuitive detour suggestions

Real-time traffic information updates alert you to congestion ahead on your planned route. The system calculates potential delay times and suggests a detour to avoid the problem.

**Depending on local service availability.*

3D city maps

In major cities, maps are enhanced by 3D images of notable buildings and landmarks along your route to make navigation easier and clearer than ever before.

Navigation features

3D Landmarks & 3D city models: realistic environment representation will ease customer's routing thanks to recognizable buildings and monuments.

2D junction visuals: it's well-known that taking a wrong exit can extend driving time considerably. With junction's representations, stay in the right lane and don't hesitate at the next turn.

Extended lane information: very helpful on highways and complex intersections to select the correct lane and avoid dangerous last minute manoeuvres or taking the wrong direction if it's too late.

Speed limits: you can check the maximum speed limit at any time and adapt your speed if necessary.

Speed cameras: drive with a more relaxed mind, being aware of fixed cameras, radar zones and stoplight intersection cameras (where allowed), adjusting your driving speed when needed.

Traffic information: very important for itinerary calculation. Avoid traffic jams and follow less congested roads to save time during rush hours and reach your destination faster.

Core POI list and search: enter destination address or select amongst a list of points of interest. For UK and Netherlands, search by extended postal codes is available.

Sign-as-real: will facilitate driver directions and reduce hesitation mistakes while driving following the system guidance.

Map changes

About 15% of the road network changes every year and so does HERE Technologies, the Toyota's map supplier, to keep the map as accurate as possible.

From the last map update (2017.Q3) to the current map update (2018.Q1), HERE Technologies has added or modified:

For accurate guidance:

+ 2,7 M street names

+ 20,000 roundabouts

+ 200 000 one-way roads

For safe travel:

+ 890,000 km of roads

+ 300 000 speed limits

+ 174,000 turn restrictions

For convenience:

+ 500,000 signpost information

+ 4,4 M Points of Interest

More information about how much the map changes over time (Map Change Viewer): <http://mapchanges.navigation.com/?app=toyota>

Freshness of map updates

Why is my map update one year old?

The creation of a map update is a long process. Indeed, before having the latest map update available for your car, we go through several steps:

a) Data collection & integration in the database (3 months): this process is done by HERE. Every quarter, HERE provides updated information on the road network.

b) Data compilation & test validation (7 - 10 months): this process is done by the system vendor and Toyota. The system vendor oversees compiling data from the HERE database to the Toyota navigation system. Once it's done, Toyota must test and approve the product. Back and forth interactions might happen in this phase.

c) Distribution (2-3 weeks): once the product has been integrated and tested in the Toyota navigation system. It usually takes 2-3 weeks for Toyota Europe to distribute the product to all Toyota dealers.

Why is the map in my recently bought map update outdated? Why does it take so long to compile maps while other companies (e.g. Google) do this on a daily basis?

The production of an in-vehicle map update is very complex (data collection, data compilation, data testing and distribution). The duration and constraints on compilation and testing are far greater in the automotive industry than in consumer electronics (PND, phones) because:

a) Database increasing size: every year, the size of the map database increases significantly (new streets, new details, etc.) and the map update needs to be contained within a fixed file size.

b) Product bug checking: the product needs to be right first time. Unlike phones or computers, bugs cannot be fixed with a simple download, a remote bug fix or even a reboot.

c) Old navigation systems: updates need to run on navigation systems that have sometimes been designed and launched many years ago, possibly on several navigation systems and need to keep on working for several years. In comparison, PND / phones have an average life cycle of 1.5 years.

Toyota offers map updates to make your navigation system perform at its best and provide you with a premium driving experience.
